Purpose of Meeting

- Share information on the proposed South Mt. Juliet Road (S.R. 171) Widening Project
- Receive input from the public
- Answer your questions and take your comments

Project Location

- Located in Wilson County
 - ∧ Project Beginning: South of Central Pike (S.R. 265)
 - ∧ Project End: Near Providence Way / Adams Lane
- Improvement Length
 - ∧ S. Mt. Juliet Rd. 1.5 miles
 - ∧ Central Pike 0.5 miles
- South Mt. Juliet Road (S.R. 171) serves as the main corridor within the city on the south side of Interstate 40

Project Purpose and Need

- **Project Need**

- The project is needed due to existing South Mt. Juliet (S.R. 171) facing growing travel demand and the inability to handle the current and projected traffic volumes given the current lane capacity. The growing traffic volumes result in congestion issues that cause the arterial capacity to deteriorate and there are safety concerns that will need to be addressed as well.

- **Project Purpose**

- Improve Capacity
- Improve Safety
- The purpose of the proposed improvements is to improve capacity and safety of South Mt. Juliet Road (S.R. 171) . The increase of the capacity of South Mt. Juliet Road (S.R. 171) would result in improvements to travel times and easing of congestion on South Mt. Juliet Road (S.R. 171) and the intersections along the route.
